

January 2023

Notification of Model Changeover and Price Revision

Dear Valuable customers,

We would like to inform you that we will officially release newly designed ultrasonic products from January 1, 2023.

We believe the new products will be favored by our customers.

In addition, under the influence of world instability, raw material prices have risen sharply. We have been striving to maintain product prices by thoroughly rationalizing and reducing costs, but this time, we are unfortunately not able to continue absorbing the negative effects on our business.

Therefore, we are willing to increase ultrasonic machine prices along with model changeover.

1. Effective date January 1, 2023

2. Product

- Ultrasonic Cutters
- Ultrasonic Polishers

We would like to ask you to contact inquiry@sonotec.com about new prices.

We will continue to strive to improve quality and service more than ever, and we would like to ask for your continued support.

Sincerely,
Sonotec Co., Ltd.
